**DETAILED ACTION**

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 6, 2004 has been entered.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 1-6 and 19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added limitation "at least two different single crystal conductive materials" is new matter.

5. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 recites the limitation “the hybrid substrate according to Claim 1, wherein each of the at least two different single crystal conductive materials is selected from the group consisting of GaAs, InP, silicon, optoelectronic devices, and GaN-based high-electron mobility transistors (HEMTS)”. The limitation “optoelectronic devices, and GaN-based high-electron mobility transistors (HEMTS)” make the claim indefinite because it is unclear how the GaN-HEMTS and optoelectronic devices are material arrangements within the scope of the Markush group. HEMTS and optoelectronic devices are devices, not single crystal conductive materials, but rather devices.

*Response to Arguments*

6. Applicants’ arguments in view of their amendments to the claims regarding the 35 U.S.C. 102 and 103 rejections made over the Short and Ohori references have been deemed persuasive and the rejections have been withdrawn.

Regarding the rejection made to claim 4 under 35 U.S.C. 112 2<sup>nd</sup> paragraph, applicants have not argued this rejection other than to note that independent claim 1 has been amended. The rejection to claim 4 has been maintained with respect to the limitations “optoelectronic devices, and GaN-based high-electron mobility transistors (HEMTS)”.

7. A new matter rejection under 35 USC 112 1<sup>st</sup> paragraph has been made to claims 1-6 and 19 in view of applicants’ amendment to the claims since no support can be found for the limitation “at least two different single crystal conductive materials”.
